Official GRE Scores

Last updated: Aug 12, 2024

Overview

+ Table of contents

Official GRE scores are submitted electronically to PharmGrad directly from Educational Testing Services (ETS) using a special PharmGrad GRE code that is different for each program and different from the school's regular GRE code. Schools can only see scores that are sent with their code. Review the list below to determine your program's PharmGrad GRE code, if applicable. If your program is not on this list, review their homepage instructions in the Program Materials section or contact them directly to determine how you should report your scores. Paper copies are not accepted.

Official GRE scores from ETS can be received by PharmGrad at any point during the application cycle, even after your application is submitted or verified; however, some programs may have a deadline by which they want your scores posted. Once your official GRE scores are attached to your application, they cannot be removed.

Note that ETS provides the GRE® Fee Reduction Program for individuals who can demonstrate financial need, for those who are unemployed and receiving unemployment compensation, and for national programs that work with underrepresented groups. To learn more about this program, review the GRE® Fee Reduction Program page.

Submitting Your Official GRE Scores to PharmGrad

1. Self-report your GRE scores in the Standardized Tests section of the application and include your ETS Registration code. Additionally, enter your date of birth in the **Biographic Information** section. These must be listed for your official scores to be matched to your application.

2. Review the list of PharmGrad GRE codes below to determine your program's PharmGrad code, if applicable. If you are applying to multiple programs, supply each individual code to ETS to ensure that all programs can view your scores.

3. Provide the codes to ETS and request that your scores be released. Check with ETS about their turnaround and processing times.

4. After ETS processing, scores are sent to PharmGrad in batches and then posted to applications every 2-3 business days. Only scores that you requested using PharmGrad codes will post to your application. You can view scores attached to your application in the Standardized Tests section of the **Check Status** tab.

Missing Test Scores

It is your responsibility to follow up on any missing GRE scores in a timely manner. Before contacting PharmGrad customer service, first confirm if and when ETS sent your scores to PharmGrad and confirm your program's PharmGrad GRE code.

If you confirmed that ETS sent your scores to PharmGrad and your scores are not posted at least two weeks after your test date, then contact customer service and provide them with the following details:

- First and last names
- Date of birth
- CAS ID
- GRE Registration ID Number
- School code and name
- Test date
- Date scores were sent by ETS

We will use this information to determine if we have received the batch and to locate your scores, if possible. If your scores aren't found, we will contact ETS to troubleshoot.

Note: if your name or date of birth appears differently on your GRE than it does on your PharmGrad application, your scores will not automatically post to your account. This often happens with applicants with hyphens, apostrophes, etc., in their names. Wait until ETS processes the scores, then contact customer service so they can manually connect the scores to your application.

PharmGrad GRE Codes

This list contains all PharmGrad programs who have a PharmGrad GRE code.

PharmGrad Program	GRE Code
Albany College of Pharmacy and Health Sciences	7804
Chapman University School of Pharmacy	4315

PharmGrad Program	GRE Code
Northeastern University	3110
University of Pittsburgh	7805
